Summary

Motivated Electronics and Communication Engineering student with a strong foundation in networking, cybersecurity, and embedded systems. Passionate about technology and problem-solving with hands-on exposure to networking concepts, cyber threats, and system security. Eager to apply technical knowledge in real-world engineering environments.

Education

El Shorouk Academy, Cairo

Sep 2023 – 2028 (Expected)

Bachelor of Electronics & Communication Engineering

Developing knowledge in communication systems, electronics, networking fundamentals, and signal processing.

Skills

- Networking Fundamentals
- Cybersecurity Basics
- Cisco Packet Tracer
- Network Security Concepts
- Problem Solving
- Linux Basics
- Wireshark
- Embedded Systems Basics
- C Programming
- Python Basics
- Digital Electronics
- Communication Systems

Certifications

Cisco Networking Academy

Oct 2025

Introduction to Cybersecurity

- Gained understanding of cybersecurity principles and online safety.
- Learned about common cyber threats, attacks, and vulnerabilities.
- Explored methods for protecting personal and organizational systems.
- Introduced to career paths in cybersecurity.

Projects

• Basic Network Design using Packet Tracer –

Designed and simulated small-scale network topologies including routers, switches, and end devices.

Tools: Cisco Packet Tracer.

• Cybersecurity Case Study –

Analyzed common cyber attacks and proposed mitigation techniques based on cybersecurity best practices.

• Electronics Mini Projects –

Built and tested simple electronic circuits including logic gates and basic analog circuits.

Tools: Breadboard, Basic Components.
